

# No Time To Waste

## SUSTAIN

Since 2018 the Kick-In Committee is supported by a Sustainability Working Group in collaboration with sustainability association 'Sustain'. Already a lot has been accomplished, but there are still enough challenges ahead!

In 2019, a fully vegetarian lunch was introduced

During each activity, waste is separated into different streams

Disposable plastic cups are replaced by rPET

Records are kept of left-overs after each meal

Replacing diesel by electric vehicles

More fairtrade and biological food products

Participants and partners are actively informed through:

Gradual transition from diesel to hybrid generators

Stimulate use of reusable water bottles and increase visibility and accessibility of water taps

Are you willing to help us making the Kick-In more sustainable?
